

Pablo M. Sánchez Alarcón

SPACE MISSIONS · DATA SCIENCE · GALAXY EVOLUTION

NPP fellow at NASA Ames, California

✉ pmsa.astro@gmail.com | 🏠 Personal Page | 📧 PabloMSanAla

Summary

PhD astrophysicist specialising in low-surface-brightness (LSB) imaging and calibration of space telescopes, with direct experience across the mission lifecycle, from proposal design (PI, HST Cycle 32) through commissioning and operations (Roman zodiacal light, stray light, and PSF calibration) to data pipeline delivery (ROSALIA, astropipe, ELIPSE). Three first-author and 12 co-authored publications on LSB galaxy structure using Spitzer, Hubble, Euclid, and Roman data. Over 8 years building and maintaining Python-based science software, including tools used by mission teams beyond my own research. Currently working as a NASA Postdoctoral Fellow at NASA Ames, California, working on subtraction of galactic cirrus on Roman Space Telescope using machine learning, and part of the team developing the ROSALIA pipeline.

Research Interests:

- 👁 **Low Surface Brightness Universe:** Dwarf galaxies, UDGs, extended discs, and tidal structures.
- 👁 **Space missions:** Planning, calibration, stray light, and extended PSF modelling.
- 👁 **Observational Astronomy:** Data analysis techniques, image calibration, observation techniques and analysis.
- 👁 **Data Science, ML & AI:** Parallel/GPU software, transformers, neural networks, and Bayesian deep learning.

Professional Experience

NASA Ames Research Center

California, USA

POSTDOCTORAL FELLOW

Jan. 2026 - today

- Selected for the **NASA Postdoctoral Program** fellowship (NPP) to lead research on **Low Surface Brightness (LSB)** science using data from **Euclid** and **Roman** space telescopes. Developing novel **Artificial Intelligence** and **Machine Learning** frameworks to detect and characterize faint galactic structures and **galactic cirrus** in deep Roman space imaging.
- Contributing developer on **ROSALIA** (Roman Sky Analyst for Low surface brightness Imaging & Astronomy), the mission's LSB sky-analysis pipeline.
- Supporting Roman commissioning activities: zodiacal light, stray light, and extended PSF model calibration to assess LSB capabilities.

Instituto de Astrofísica de Canarias

Tenerife, Spain

PREDOCTORAL FELLOW

Sept. 2021 - Sept. 2025

- Conducting astrophysical research towards the completion of the PhD, specializing in observational astronomy and low surface brightness.
- Analysis of state-of-the-art deep imaging from different ground- and space-based telescopes (HST, Spitzer, Euclid, INT, VLT) and surveys (Legacy Survey, SDSS, DES). Topic on studying the faint outskirts of galaxies, with emphasis on developing software optimized for low-surface-brightness (LSB). Experience reducing and calibrating images with techniques optimized for LSB. Software development of end-to-end pipelines.
- Supporting observational campaigns (over 56 nights in professional observatories), from observational planning of surveys, to conducting observations, to reducing the data.

Observatoire Astronomique de Strasbourg

Strasbourg, France

RESEARCH VISITOR

March - May 2025

- Collaborating with Dr. Pierre-Alain Duc to develop low-surface-brightness techniques for *Euclid* imaging and analysis.

University of Oulu

Oulu, Finland

RESEARCH VISITOR

March - June 2023, December 2024.

- Research collaboration with Dr. Heikki Salo: calibration and analysis of Spitzer images for the S⁴G survey.

Astronomical Observatory of the U. Autónoma de Madrid

Madrid, Spain

INTERNSHIP FOR DATA ANALYSIS

Sept. 2018 - June 2019

- Developed a Python-based data reduction and calibration pipeline for the observatory's CMOS imager while operating as lead telescope operator, supporting instrument maintenance, and delivering calibrated survey data used by degree students — early experience spanning software development, instrument operation, and end-user data delivery.

Education

Universidad de la Laguna

Tenerife, Spain

PH.D. IN ASTROPHYSICS

GALAXY EVOLUTION AND DISC STRUCTURE THROUGH DEEP SURFACE PHOTOMETRY.

Supervisor: Prof. Johan Knapen **Co-supervisors:** Dr. Javier Román and Dr. Sébastien Comerón.

Sept. 2021 - August 2025

- Investigated disc structure evolution from isolated galaxies to *Euclid*'s statistical sample of thousands of discs out to $z \sim 1$, and built the Complete Spitzer Survey of Stellar Structure in Galaxies (CS⁴G), a 3,239-galaxy reference catalogue for *Euclid*, Rubin, and Roman.
- As a part of my thesis, I participated in several training activities, such as doctoral schools, congress, observational campaigns, research stays, and seminars. I have also been on the IAC's seminars committee for three years, and participated in outreach events.
- Grant:** FPI-2020
- Defence Date:** 29 of July 2025. Graduated with the highest mark, **Cum Laude** distinction, and international mention.

Universidad Autónoma de Madrid & Instituto de Física Teórica

Madrid, Spain

M.Sc. IN THEORETICAL PHYSICS, SPECIALIZATION IN ASTROPHYSICS AND PHYSICS OF THE COSMOS, TOTAL 60 ECTS

Sept. 2019 - July. 2020

- **M.Sc. Thesis (with honours) FABADA: Fully Adaptive Bayesian Algorithm for Data Analysis:** Novel noise reduction method, specifically for astronomical data in 1D and 2D. Implemented in **Python** and published in **RASTI**.
- **Grant:** Beca Fondo Social U. Autónoma de Madrid

Universidad Autónoma de Madrid

Madrid, Spain

B.Sc. IN PHYSICS, TOTAL 240 ECTS

Sept. 2014 - July. 2019

- **Grant:** Ministerio de Educación y Formación Profesional (MEC)

Accepted Proposals as PI

Hubble Space Telescope (Cycle 32): 2 orbits with ACS@WFC (Scheduled Feb 2026). Awarded a \$53k grant. [\[Proposal Link\]](#)

William Herschel Telescope (2025B): 3 hours (3 observing blocks) with the WEAVE LIFU instrument.

Isaac Newton Telescope (2024A): 5 nights with the Wide Field Camera (WFC).

William Herschel Telescope (2023B): 5 hours (5 observing blocks) with the WEAVE LIFU instrument.

SARA Telescope Network (2023B): 46 hours across 1 m telescopes (7 nights at Cerro Tololo, Chile; 3 nights at JKT, La Palma).

I have also participated as Co-I on other accepted proposals, including the [The Roman eXtreme Deep Field \(RXDF\)](#).

Observational Experience

Over 50 nights of professional observing experience across six facilities, spanning optical imaging and spectroscopy:

35 nights **Isaac Newton Telescope**, 2.54 m, Wide Field Camera, Observatorio Roque de los Muchachos

La Palma, Spain

7 nights **SARA Telescope**, 1.0 m, Cerro Tololo Inter-American Observatory

Cerro Tololo, Chile

4 nights **CAHA Telescope**, 2.2 m, CAFOS instrument, Calar Alto Observatory

Almería, Spain

3 nights **Jacobus Kapteyn Telescope**, 1.0 m, Roque de los Muchachos

La Palma, Spain

2 nights **Carlos Sánchez Telescope**, 1.52 m, MusCAT2 instrument, Teide Observatory

Tenerife, Spain

6 hours **Green Bank Telescope**, 100 m, VEGAS instrument, Green Bank Observatory

West Virginia, USA

Software & Tools

ROSALIA Core contributor to Roman Space Telescope's low-surface-brightness sky-analysis pipeline.

FABADA Author of open-source Bayesian noise-reduction package (published RASTI, 2023). ★ 25 🐦 3

ELIPSE Developer of end-to-end automated pipeline for galaxy surface photometry for the Euclid Wide Survey.

astropipe Creator of an astronomical toolkit for extended source masking, structural fitting, and surface photometry.

Scientific Meetings

EAS2026

Lausanne, Switzerland

E-POSTER & CONTRIBUTED TALK: "ROSALIA: ENABLING ULTRA-LOW SURFACE BRIGHTNESS IMAGING WITH ROMAN"

July 2026

Working with Euclid Q1: From Data Access to Science

Madrid, Spain

CONTRIBUTED TALK: "DISC BREAKS HIGHLIGHT THE STRUCTURAL EVOLUTION OF GALAXIES THROUGH COSMIC TIME"

Dec. 2025

Galaxy Memoirs: Inferring their past from their present

Búzios, Brazil

CONTRIBUTED TALK: "UNVEILING DISK BREAK EVOLUTION IN GALAXIES WITH EUCLID"

Aug. 2025

Euclid from Q1 to DR1 (Joint Science Working Groups Meeting)

Tenerife, Spain

CONTRIBUTED TALK: "EVOLUTION OF DISC BREAKS AS SEEN BY EUCLID"

Jan. 2025

LSST@Europe 6

La Palma, Spain

LOC MEMBER & CONTRIBUTED TALK: "CS⁴G: DISC GALAXY EXTENSION AND SURFACE BRIGHTNESS PROFILES"

Sept. 2024

XXXIIst IAU General Assembly

Cape Town, South Africa

CONTRIBUTED TALK: "CS⁴G: DISC GALAXY EXTENSION AND SURFACE BRIGHTNESS PROFILES" [\[ID: 2469\]](#)

Aug. 2024

3rd Annual Meeting of the CAVITY Project

Granada, Spain

CONTRIBUTED TALK: "INT DATA CAMPAIGNS AND SURFACE BRIGHTNESS PROFILES"

Jun. 2023

XV Reunión Científica de la Sociedad Española de Astronomía (SEA)

E-POSTER & CONTRIBUTED TALK: "FULLY ADAPTIVE BAYESIAN ALGORITHM FOR DATA ANALYSIS (FABADA)"

Tenerife, Spain

Sep. 2022

XXXIst IAU General Assembly

TWO CONTRIBUTED E-POSTERS (ONLINE)

Busan, Korea

Aug. 2022

European Astronomical Society (EAS) Annual Meeting

TWO CONTRIBUTED E-POSTERS: AMIGA & FABADA

Valencia, Spain

Nov. 2021 **2nd IAA-CSIC Severo Ochoa School on Statistics, Data Mining, & ML**, IAA

Granada, Spain

Nov. 2021 **IAA Severo Ochoa Advanced School on Star Formation**, IAA

Granada, Spain

Sep. 2020 **Machine Learning Specialization**, Univ. of Washington

Online

Feb. 2020 **XV SVO School**, Spanish Virtual Observatory

Madrid, Spain

Scientific Activities

INVITED TALKS

2025 **Invited Talk**, Observatório do Valongo

Rio, Brazil

2025 **Invited Lecture**, Automated Image Analysis at the "EDUCADO" Observing School

La Palma, Spain

2025 **Invited Seminar**, Strasbourg Observatory

Strasbourg, France

2025 **Invited Talk**, "EDUCADO" Mid-Term Meeting

La Palma, Spain

2024 **Invited Talk**, University of the Witwatersrand

Johannesburg, S.A.

2023 **Invited Talk**, Celebrating John Beckman's 60 Years in Astrophysics (IAC)

Tenerife, Spain

2023 **Invited Seminar**, University of Oulu

Oulu, Finland

ACADEMIC SERVICES

2026 **Referee**, Monthly Notices of the Royal Astronomical Society

MNRAS

2024 **Referee**, Astrophysics & Space Science Journal

SpringerNature

2022–24 **Committee Member**, Seminars Committee at the IAC

IAC

TEACHING & SUPERVISION

2026 **M.Sc. Co-Supervisor**, Matías Salah: Galaxy halos in dwarf galaxies using deep GTC imaging

VIU

2026 **M.Sc. Supervisor**, Marta Sánchez: ML classification of galaxies surface brightness profiles (Honors & 2k€ Prize)

UCM

2022 **B.Sc. Co-Supervisor**, Carlos Gil-Igual: PSF deconvolution & noise reduction (Adaptive Wiener Filter)

UAM

2022 **B.Sc. Co-Supervisor**, Pablo Jimenez Sánchez: Sky background subtraction & signal detection

UAM

OUTREACH ACTIVITIES

2024 **Invited Speaker**, "Amigos del IAC" Public Seminar [\[Video\]](#)

Online

2019 **Workshop Lead**, Astrophotography Workshop (3 sessions), IV Jornadas Astronómicas

UAM, Madrid

2018–19 **Observational Support**, Guided >20 public observation nights at the UAM Observatory

UAM, Madrid

2015 **Invited Speaker**, Astrobiology Talk, "Universal Fun Facts", Biology Dept.

UAM, Madrid

Honors & Awards

2020 **With honors**, M.Sc Thesis, FABADA, Fully Adaptive Bayesian Algorithm for Data Analysis

Madrid, Spain

2019 **1st position**, Astrophotography Contest IV Jornadas Astronomicas, U. Autónoma de Madrid

Madrid, Spain

2019 **Admitted**, Program for the Promotion of Knowledge Transfer 2019, U. Autónoma de Madrid

Madrid, Spain

2019 **With honors**, B. Sc. Thesis about Data Analysis

Madrid, Spain

2019 **With honors**, B. Sc. Thesis about Astrophysics

Madrid, Spain

Skills

PROGRAMMING LANGUAGES

Advanced Skills Python, Linux, SQL, Shell
Basic Skills C/C++, R, Julia, Matlab/Octave, JavaScript.

SOFTWARE

Advanced Skills μ TECH, SExtractor, SWarp, SCamp, PSFEx, GNUastro, Topcat, Astropy, DATALABS, PixInsight, Photoshop, Microsoft Office
Intermediate Skills Streamlit, OpenMP, CUDA, Numba, ALADIN, ESASky, IRAF
Basic Skills MPI, MongoDB, TensorFlow, STILTS, Grafana, TuriCreate, Poetry

LANGUAGES

Native tongue Spanish
Advanced English (IELTS score 7.5 (C1 level))
Basic French, learning

Refereed Publications

I have published 3 first authors' papers in refereed journals, participated as co-author in 12 articles, and published one proceeding. A completed list of all publications I have been involved can be found in this [ADS Library](#)
